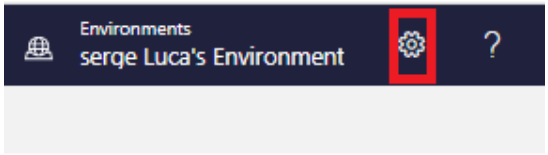
Lab 0. Setting up the experimental designer & activate your community license

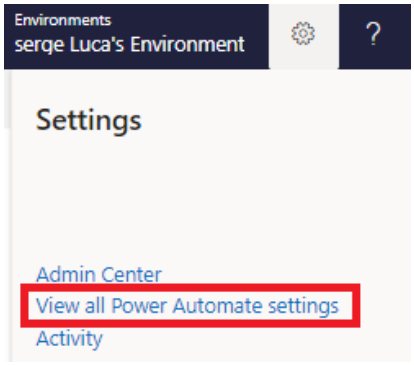
Task: Select the new Power Automate designer

At the time of writing, the new Power Automate designer is still in experimental stage. To select the new designer,

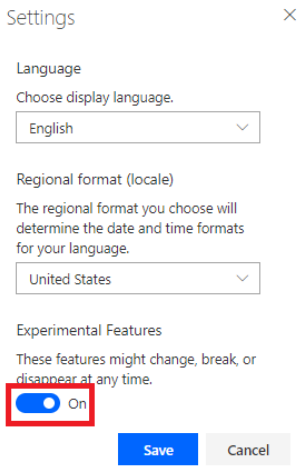
1. go to **flow.microsoft.com**,
2. select the **setting**s button:



3. Select **View all Power Automate settings**:



4. Check the **Experimental Features** option:

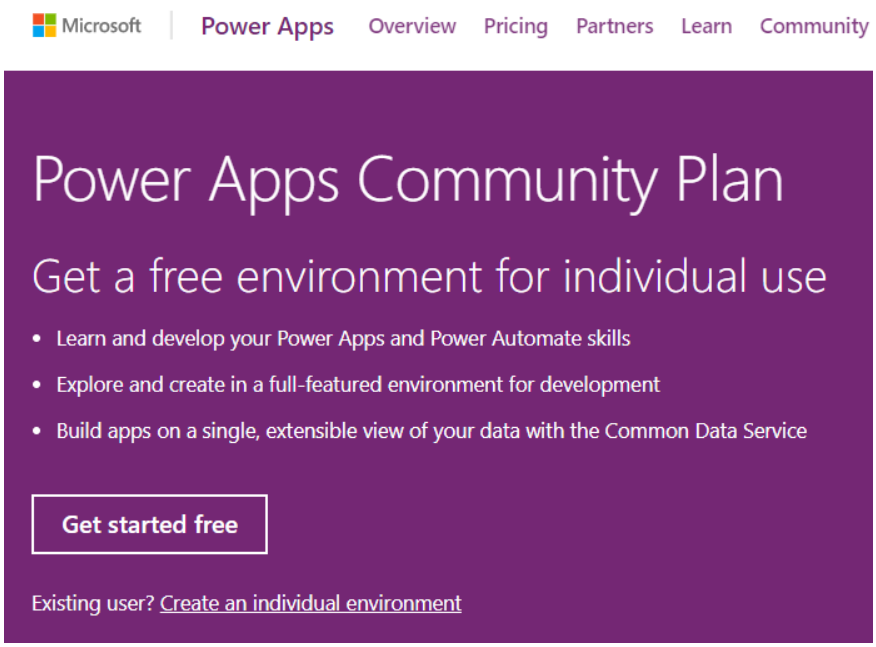


5. Click **Save**.

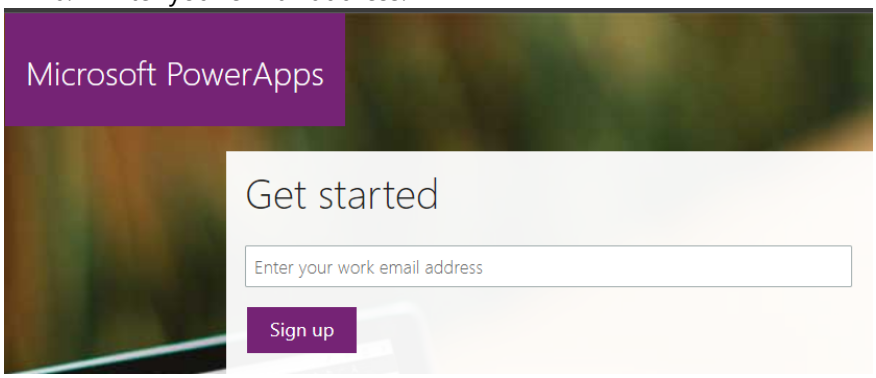
Task: Activate your Community license

The Office 365 license provides you with a Standard Power Apps and Power Automate license, which is good enough for most labs. However, some labs require a Premium connector; the Community license gives you access to **Premium features** of the product for free. The main restriction with the Community license is that flows and applications created with the Community license cannot be shared with other users.

Go to https://powerapps.microsoft.com/en-us/communityplan/ and click Get started for free



6. Enter your e-mail address:



7. And Sign-in:
